

# GNOME Games Collection

The **GNOME Games collection** is a collection of about 15 puzzle video games that is part of the standard free and open-source GNOME desktop environment.<sup>[4][5]</sup> They have the look and feel of the GNOME desktop, but can be used without it.

## History

As of late 2017, the GNOME Games collection is in the process of being modernized.<sup>[6]</sup>

## Game list

It currently includes the following games:

- 2048** – a clone of a popular game by the same name written in Vala.<sup>[7][8]</sup>
- AisleRiot** (or "sol") – a suite of 88 Solitaire card games.<sup>[9]</sup>
- Chess** – a graphical front-end written in Vala to be used with a chess engine
- Four-in-a-row** – a clone of Connect Four
- Hitori** – an implementation of Hitori
- lagno** – a clone of Reversi
- Klotski** – a sliding block puzzle game, see Klotski
- Lightsoff** – a brainteaser
- Quadrappel** – a clone of Tetris (previously called Gnometriz prior to October 2009).
- Mahjongg** – an implementation of the traditional Chinese game for a single player, see Mahjong solitaire
- Mines** – an implementation of Minesweeper computer game.
- Nibble** – a remake of Nibbles.

### GNOME Games

- **Robots** – a clone of the turn-based game Robots
- **Sudoku** – an implementation of Sudoku with a good generator.
- **Taquin** – two 15-puzzle games
- **Tetravex** – an implementation of the edge-matching puzzle game Tetravex
- **Swell Foop** – a clone of the SameGame (previously called Same GNOME).
- **Tali** – an implementation of a dice game similar to Yahtzee/Kismet

(<https://wiki.gnome.org/Apps/Games>)

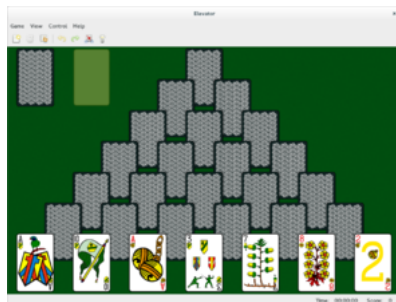

The following games have been removed but previously included:

- **Blackjack** – a computerized implementation of the gambling game Blackjack. It was removed in October 2009.
- **gbrainy** – a brain teaser software written in C# using Mono
- **GNOME Mastermind** - a software implementation of Mastermind
- **GNOME Pipes** – a Pipe Mania clone
- **GNOME Untangle** – an implementation of Planarity
